

# CHANGE NOTICE

**Effective Date:** DECEMBER 1, 2010  
**Log Number:** CN-10-424  
**Subject:** NAMEPLATES  
**Model Affected:** ALL MODELS

## NEW NAMEPLATES

CMA has been working closely with a name plate company to design and manufacture a more durable identification plate for our dishmachines. We are happy to say the design is now complete and the new plates are now being used. The artwork (top half of the plate) has a protective coating to guard against the elements and from routine scouring used in daily dishmachine maintenance.

The regulatory logo's (most important aspect of the plate) will be engraved for the preservation and longevity of the plate, which will be a real asset in refurbishing. The change is in compliance with NSF, UL and ETL that dictate the requirements of identification plates.

**TOP PART OF NAMEPLATE  
5 MIL LEXAN**

**BOTTOM PART OF NAMEPLATE  
ALL MARKINGS ARE ON SATIN  
ALUMINUM WITH ETCH & FILLED**
