

CHANGE NOTICE

Effective Date: AUGUST 8, 2012
Log Number: CN-04-438
Subject: THERMOMETER LOCATION CHANGE
Model Affected: CMA-180

CMA-180 THERMOMETER BRACKET PN 17534.00

The thermometers for the CMA-180 have been removed from the control panel and relocated on its own "dual gauge bracket" set back away from the steam zone. The new location will reduce the moisture the thermometers will be subjected to, and provide easier access for service. The new thermometer bracket has been etched with the words "Rinse and Wash" to easily identify each of the thermometers.

The new thermometer bracket can be installed on existing machines in the field by securing to the top of the CMA-180 wrapper.
